### **REASONS FOR ALLOWANCE**

1. Claims 5-7, 16-18, 20-23, 25, 26, 29, 30, 33, and 35-48 are allowed.

The following is an examiner's statement of reasons for allowance:

Regarding claims 6, 7, and 21, prior art does not disclose or fairly suggest a photoelectric conversion device including an energy level at an interface between an amorphous silicon nitride layer and an amorphous silicon layer discontinued on a valence band side and equal on a conduction band side, in combination with all the limitations in each respective claim. Claims 5, 23, 29, 30, 35, and 39-48 are allowed by virtue of their dependency.

Regarding claim 16, prior art does not disclose or fairly suggest a solid-state imaging device including a carrier generating/multiplication layer being a single layer and an energy level at an interface between an amorphous silicon carbide layer and an amorphous silicon layer discontinued on a conduction band side and equal on a valence band side, in combination with all the limitations in the claim. Claims 20 and 33 are allowed by virtue of their dependency.

Regarding claims 22, 25, and 26, prior art does not disclose or fairly suggest a solid-state imaging device including an energy level interface between an amorphous silicon nitride layer and an amorphous silicon layer discontinued on a valence band side and equal on a conduction band side, in combination with all the limitations in each respective claim. Claims 17, 18, and 36-38 are allowed by virtue of their dependency.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
